Dear KPMG mentors,

My favourite part about STEM at KPMG was definitely when we designed our app to help students learn and communicate. It was my favourite part because it gave us the chance to be creative and get ideas from other members of our group and learn what they enjoy.

A quality I admire about the mentors is that they all worked hard and have been so helpful to help us with our 'projects' that we have been working on at KPMG. I have learnt that when designing or planning something it is really important to jot down your ideas on a piece of paper, no matter how silly you think they are. This could be really useful to refer back to at a later date.

I am grateful to the mentors, especially Brendan, for being excellent guides and making us think and be creative. It has made me more confident in how I am with other people. I hope one day when I am older and working that I will be able to pass on what I know or inspire others in this way. I would like to say a massive thankyou to all the mentors, and to whoever made the lunch every time we came, it was excellent!

Thanks again,
